Finding The Epicenter Worksheets - Learny Kids

To locate the epicenter of an earthquake, you must estimate the time interval between the arrivals of the earthquake's P and S waves (the S-P interval) on the seismograms from three different stations. The interval is measured to the closest second and then a graph is used to convert the S-P interval to the epicentral distance.

Example Answers - TeachEngineering

You are to locate the epicenter of an earthquake by making simple measurement on three seismograms that will be sent to you by the Virtual Earthquake program. Additionally, you will be required to determine the Richter Magnitude of that quake from the same recordings.

Geology Labs Online - Virtual Earthquake

Finding The Epicenter Lab With Answers Find the difference in arrival time for Denver on the y-axis of the graph. Follow this line across to the point at which it crosses the curve. To find the distance to the epicenter, read down from this point to the x-axis of the graph. Enter this distance in the data table.

Finding The Epicenter Skills Lab Answers Key

Locating An Epicenter In this lab, you will use seismograms from three locations to determine the epicenter of an earthquake. You will use the P- and S-wave arrival time difference to determine distance to epicenter, then use a compass to record the distance radius measured. New Madrid Earthquake

156 Earth Science Labs

An earthquake epicenter can be located from records made of earthquake waves on devices called seismographs. One type of seismograph is a visible recording machine, shown in Figure 2. A pen draws a pattern of the waves on paper that is attached to a revolving drum. The wave record from a seismograph is known as a seismogram - see Figure 3.

Lab 10 - Earthquake Epicenter Location

Here is the link to the activity itself: goo.gl/3kB29 Students learn how to determine the epicenter of an earthquake using seismographic data.

Locating the Epicenter of an Earthquake

To locate the epicenter of the earthquake, a minimum of 3 circles from three different seismic stations must be drawn on the map. The intersection of the three circles shows the location of the epicenter on the map. This is illustrated below.

LAB Locating Epicenters - NYS Earth Science

To locate the epicenter on the map, for each city construct a circle whose radius is equal to the distance from the city to the epicenter. b. Use the scale of distance of your map to set the drawing compass at the correct radius. 2. Mark and label the epicenter on the map where all three circles intersect.

answers to locating an epicenter lab - Bing

This is a video showing you how to work through some of the problems concerning the location of earthquake epicenters.
